## About This Game

Battle evil as old as time itself and save mankind from demonic forces in this thrilling hidden object adventure! Learn to use her weapon, the Chakram, to not only eviscerate evil but also solve puzzles, go back in time to when the Order was young to cut off the demons at their knees, and solve the mystery of Kate's amazing destiny. Packed with rich interactivity, stunning animation, and unique hidden object scenes, Dark Angels: Masquerade of Shadows will captivate you from beginning to end!

Rather short but has interesting characters.

Choices change the ending of the game in a rather large scale for the small event is.

Really hoping for an expansion on the story or sequel of some sort.. Had loads of fun with this game some time ago. If you like tycoon games, try this one, but as other have mentioned, get it from somewhere else, this version is very buggy. Shame, really, as the game is so much fun.

Not recommending purely due to the Steam version being so glitchy. I'm a fan of simple platformers and this definitely fits the bill.

The one thing I really look for is either a smooth and beautiful style or a particularly well balanced challenge. This game definitely fits the first criteria. The challenge isn't too great though.

The platforming is smooth and the puzzles are all pretty simple. It utilizes the duplication mechanic very well, but still feels more like a simple app for tablets than a full PC game.

If you like the style and the duplication mechanic in games then definitely pick this up.

If you are unsure then I say grab it, just wait for a sale.. The setting is pretty and the puzzles are clever (if not particularly difficult), and their a nice ambiance... that is all but ruined but a constant, annoying, obnoxious voice over that plays over the whole thing. It's enough to make one want to play the game without that audio, though if you did I suppose you wouldn't understand the pseudo-intellectual masturbation session that was the story. Still, the puzzles were pretty good.. DEAR. this game maker

are you crazy?

why patch super jump??

after patch .. if you play this game and finish.. i give you dragon 10 staff

reset jump .. and last place easy patch

so.. you don't do

I Find you

Beautiful HOG on exotic setting ^^  
I wish it were longer. DO NOT GET!!!!

Was not worth the money and it super buggy,  
it is not nearly as simple as it is in the video,  
. I use to play this game quite alot back in the old days, when in order to change the world you had to sink your gems into the elevator machine and hope it changed to something you liked. I check back in this game last year or so, and it's just gone down the crapper. Try doing a mission to progress your story: no one's on to join, and if they do, one death and they quit. Most of the people i've run into are just standing in front of the auction house, hoping some hard to get item appears, and the most popular guild i know hasn't been active in years. Add onto the fact that almost 99% of the stuff you want can only be bought withVaccessed with real money, (and don't say that they don't. try getting a key for the endgame dungeon crafting station from the auction house. never gonna happen) and this is just another game that had 'pure' beginings and is now 'corrupted' into a pay2win model. -1/10

Also, LAG! LAG EVERYWHERE!!!

LAG!. Cute game, lots of fun. Very good, for what it is. Beat it in less than half an hour. I'm glad I have it!. This is fun and charming game with a nice fight mechanic. The story is so far funny and also intriguing enough to keep me wanting to find out more, even with the way that little kid speaks.

As always you can judge for yourself. This video shows about the first 15 mins of play with me reading the dialogue...most of the time

<https://youtu.be/37m3LmDAK14>. You're either going to love this game, or hate it. With it's proper synth sound track you'll be wanting to jump and dart you away around the forward facing track in time with the beat, and once you manage it, it does feel really great.

Doing that however isn't quite as simple as you'd think. While it's learning curve is non-existent, you're going to have to up your skill level to gain any traction in this game. A good memory of the level layouts is going to help you refine your gameplay. The game nudges you to go faster, that's not always the best route, slow and steady wins the race and ups your ability to master the levels. It's a all or nothing system, no retries, no rewinds. One hit, you're dead. Start from the beginning of the level. This itself is retro gaming, the 80's styled graphics and sound track just add to it.

Some of the later levels are really hash, and can be come frustratingly tricky to complete, even more so than the somewhat obnoxious tutorial from the get go. Stick with it, take yourtime to learn to finesse the controls, and you'll enjoy rolling.

If you can get it on sale, grab it. It might not be one of those games you always come back to, and it's certainly not one you or a friend can pick up and play without some commitment to it, it'll leave you with a retro syth overload of games gone by, even if they didn't look as good as this one.

A very nice kick of pseudo nostalgia, for a decent price.. Cheap and cheerful - not much else to say :).. Relaxing game, the story happens in a school.

You need to decide seats for all characters to get highest compatibly score and unlock achievements.

Girls ♀ robots, girls ♂ nerds, nerds ♀ robots, biologist ♀ ♀, ♀ ♂ girls...

No storyline, no impressive characters, no expected art style.

Weird combos and enemies :doubt:

??

?? ok so it took till after the election to work but its finally here. So overall its what you expect you have to click to earn votes with each campaign being 24 hours. You can invest in votes for those upgrades so you can earn votes per second while offline. However, the boosts in this game almost want you to stay on full time though I don't know why. See this game doesn't have quotes from the candidates like it boasts. It does have the 3 Hillary and Donald trump debates but that is only if your so sadistic to want to read them. The problem is the amount of votes you can click only goes up to 100 votes and even if you pay the 0.49 cents for the boost like I did its impossible. See you have to spend votes for the upgrades and even with a 3x mutiplier for the upgraedes and a 2x upgrade on that you will still find it nearly impossible. You get coins if you

win a majority or a landslide. Though I'm not sure how its calculated they never explain. You can unlock other candidates but with the ridiculous requirements like 20 landslide victories or 999 vote coins (keep in mind 20 landslide victories means you will have been playing for 20 days) there is nothing to this game and its very boring very quickly. I wish they somehow included the republican and democratic primaries or the other debates and quotes like they promised but they didn't. This game is honestly not worth playing the only reason you would is if like me your curious to see if somehow there will be more but there isn't.

Hey Hunters,

How have you been?

We've been getting ourselves ready for 2019, and especially for our participation at GDC, the Game Developers Conference, that takes place in San Francisco.

Our goal is to get as close as we can to our planned Alpha version. The first step was already completed: the game has LOOT now! But we have 3 weeks to get ready for GDC, so we are prioritizing two things: making the game prettier and making it less buggy and more stable.

New Trailer Incoming!. **WEEKLY UPDATE - OUT RIGHT NOW!**

Ok so we're not rolling out the FTUE (these things take time to do right) but we have a TON of great stuff for you. Some was on the roadmap. Some was just annoying us or excited us to tweak. So here we go!
