Being able to play games, in your spare time, while relaxing, with only a computer and a decent internet connection, is a dream come true. However, once you've been playing for a while, there can be a problem of distraction and you'll find yourself wondering where the time went. Multi Theft Auto If you're in the same situation, while you're playing a game, there's no way you can help but start opening several websites. The problem is that you'll probably need to view them, but after the first few seconds, you'll have forgotten where you left off. So, in a perfect world, there'd be a way to close the window you were looking at, whenever a game opens a new one. Enter Multi Theft Auto. Multi Theft Auto Description: As the name implies, Miti Theft Auto is a program that allows you to play more than one game at the same time

Subtelomeric rearrangements are associated with recurrent miscarriage and chromosomal defects. Despite the availability of targeted subtelomere arrays, the prevalence of subtelomeric rearrangements is not known. We used fluorescence in situ hybridisation (FISH) on invasive chorionic villus (IVF) samples to perform subtelomere screening of 1236 families with unexplained recurrent miscarriage (URM). We identified 67 cases of subtelomeric rearrangements. Of these, 43 were in intrachromosomal arrangements (30 balanced and 13 unbalanced) and 24 were in interchromosomal rearrangements (17 balanced and 7 unbalanced). Of the 32 cases with clinical information, 19 were unrelated while 13 were in first cousins (mean difference 1.28, 95% CI 0.52-2.03). In all but one case, the parental karyotypes were available (100% male and 100% female; P = 0.57). Only four cases (3%) were inviable, all of which had unbalanced interchromosomal translocations involving chromosomes 1 and 16, 1 and 3, 2 and 2 or 4 and 2, respectively. We showed that subtelomeric screening is a successful method to detect subtelomeric rearrangements in URM and that their frequency appears to be very low in this cohort of cases. Top Selling Items This Week: Bears
We are relieved to bring you this update...this week on the Bears. This week was a weird week of Bears news because the Bears News Page has been taken over by the fan-run BUFFALO WOLF website. We miss you, Buffalo Wolf. We have no idea what is going on with you but we certainly hope that you are okay. We are also relieved because we were worried you were going to have to be replaced by one of the staff Bears fan...that would have sucked. We'd have to say that though, we were the most loyal and vocal fans of this site. But, by we, we really mean The Bear Zone. At this point, we're just confused. We're not the Buffalo Wolf so, we can't help you. We don't have any clue what's going on either. We just know that this site is for Bears fans and that we feel bad for this site. We'll try to keep fans informed and informed. We'll keep everybody posted on this site. We'll keep you guys posted. We'll do what we can. We've been doing this a little more than a year and two months now. We want to take this time to thank you guys for helping us out this year and for making this site popular. We also want to thank everybody that helped this site and kept us alive and operating each and every week. As we said, we're not the Buffalo Wolf...so, we can't help you. We wish you the best of luck and we hope you're doing better. Love, The Bears Zone Staff
